

TECHNICAL SKILLS

- **Tools:** Python, C++, HTML5, CSS3, React, Javascript, WordPress, MySQL, PostgreSQL
- **Certifications:** The Bits and Bytes of Computer Networking

PROJECT

- **Blitz:** A web application using Pytesseract (optical character recognition) and OpenCV (image processing) to analyze an user-submitted image (receipt) and then sort out items that were purchased and their prices. Using React and Python, users will then be able to split the amount owed per person.
- **ChewsForYou:** A web service that randomly selects a food establishment within a set distance from the user or of a designated destination. Created using HTML/CSS and Python.
- **Speedy Snake:** An arcade game created with Python using Pygame. A game of evolution where a snake grows in length as it eats more food whilst avoiding collision with itself and the edge.
- **Bank Management System:** An admin bank account management system created using Python and MySQL that allows the admin to create, delete, or update client profiles and perform basic bank transactions within the checking, saving, credit card, and loan accounts of numerous clients.
- **Countdown Timer:** A web service, using HTML and Javascript, that counts down the time until the appointed time given by the user.
- **Weather App:** A web service (using HTML, Javascript and OpenWeatherMap API) that displays the weather for a location.
